

Harmony & Symphony of the Seas

Saint Nazaire | France

Period: 2016 and 2018
Client: STX France

The **Harmony of the Seas**, that with 227 thousand tons is one of the biggest cruise ships ever built, part of the Royal Caribbean Cruise Line fleet, has now a twin sister that sails the seas: the **Symphony of the Seas**.

Interna has been part of these magnificent projects, supplying the turn-key fit out of the interiors of many of the public areas of these two giants of the seas, such as the restaurants *Vintage*, *Chop's Grill*, *150 Central Park*, *Jamie's Italian*, *Park Café* and *Johnny Rockets* and part of the retail areas.

Interna manufactured and installed all the items in compliance with the highest standards of production, with painstaking attention to each single detail and respect of the rather rigid naval regulations.

The business relationship between STX and Interna, started in 2014, already led to the successful launch of three huge cruise ships and foresees seven more vessels in the next four years.
