We are proud to celebrate 25 years of activity, a quarter-century spent performing with passion and determination hundreds of unique and inimitable contract projects, gems of undeniable historic, architectural and artistic value over the five continents. We owe our achievements to the reliability and loyalty of our suppliers, to the performances of our extraordinary team, to the vote of confidence of our prestigious international clients reiterated during the years, to the cooperation with the great maestros of the international design. To all of them goes our gratitude. We will keep on working hard and honestly, we will keep on investing in human resources of excellence, in research, in productive innovation and in management streamlining to better face the future challenges we will have to take on.
