

Some months ago the first Atura Hotel opened on the fringe of Sydney's CBD. Created by the same innovative team that is behind the stylish QT hotels in Sydney and on the Gold Coast, Atura Blacktown is the prototype for a new hotel brand to be rolled out on the Australian market, fun and functional hotels with a dynamic, youthful design situated in city fringe suburbs and business parks.

After its successful involvement with the QT Sydney, Interna Asia Pacific was again chosen to supply custom made furniture for the guestrooms. Following the urban industrial designs of the PTI Group and Interior Design Architect Nicholas Graham & Associates, the team of Interna Asia Pacific produced all the guestroom fit-outs including the plywood cabinetry and 1950's inspired loose furniture.
