

The sophisticated Viking Star, top of the line cruise ship launched in late April 2015 in the Fincantieri shipyard in Marghera, is one of the most prestigious projects realized by Interna in the naval sector.

In detail, the supply included a complete turnkey with a full fit out (planning, assembly and final check of floors, walls, ceilings and all the furniture) of the following public areas: entertainment lounge, theatre, cinema, explorer lounge and owner suite.

The interior design, an elegant and refined contemporary mix of a varied and sophisticated choice of finishes and materials, is the work of the SMC Design studio.

Interna supplied fixed and loose furnishings in accordance with the highest quality standards and in accordance with the strict naval legislation regarding safety, health and fireproofing, and it also created special soundproofing, in particular for the theatre and cinema areas.

The Viking Star, first oceanic cruise ship of the Viking Cruises company, has been conceived for high-profile, exclusive and wealthy clients who require the highest levels of design, comfort and service on board.
